

Steel-Line's

# SAVANNAH<sup>®</sup> DOORS

*The look and feel of a smooth finish sectional door with the strength of Australian BlueScope<sup>®</sup> Steel - exclusive to Steel-Line.*

**The look and feel of a smooth finish sectional door with the added strength and durability of BlueScope<sup>®</sup> 0.6mm G300 high strength steel.**

Stylish, strong and durable. Steel-Line's innovative Savannah<sup>®</sup> range delivers a smooth finish in a wide range of customised door designs. The Savannah is made from BlueScope<sup>®</sup> Steel G300 coil delivering a far smoother and virtually blemish and shadow free finish compared to most competitors' smooth finish doors, which are made from softer G2NS steel.\* If quality, durability and a genuinely smooth door are important, then make Savannah your choice because the decision you make today will be with you for many years.

# SAVANNAH<sup>®</sup> DOORS

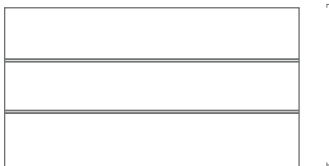

The look and feel of a smooth finish sectional door with the strength of Australian BlueScope<sup>®</sup> Steel - exclusive to Steel-Line.

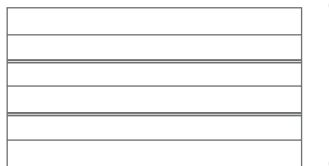

## Shadowing and oil canning minimised with 0.6mm G300 high strength steel.

Shadowing or oil canning can be defined as a perceived waviness in the flat areas of metal panels. Oil canning is an inherent part of light gauge cold formed metal products, particularly those with broad flat areas such as garage doors. Most manufacturers warn against shadowing or obvious oil canning and will not cover in warranty provisions. The use of 0.6mm G300 steel, which is a stronger grade of steel than traditional steels used for garage doors, minimises visual oil canning.

## A great range of designs and colours to choose from at an affordable price.

Steel-Line's Savannah<sup>®</sup> range of doors is available in three designs – Slim-Line<sup>™</sup>, Glacier<sup>™</sup> and Flat-Line<sup>™</sup> and in five Colorbond<sup>®</sup> Powdercoat colours well as nine DecoWood<sup>®</sup> colours. Although the Savannah<sup>®</sup> may be more expensive than other smooth finish garage doors, the quality of the door and its finish make it real value for money that will stand the test of time.

### Nine DecoWood<sup>®</sup> colours to choose from:

Ironbark Western Red Cedar Casuarina Snowgum Rose

Bush Cherry Jarrah Chestnut Kwila

Please note: The colours shown are a guide only. The limitations of printing processes make extremely accurate matches impossible. We strongly recommend comparing your choice with actual samples. As the DecoWood<sup>®</sup> finishes are to look like timber, variations in the colour will be evident. Additionally, Steel-Line reserves the right to vary or delete colours without notice.

### Five Colorbond<sup>®</sup> colours to choose from:

Surfmist<sup>®</sup> Paperbark<sup>®</sup> Jasper<sup>®</sup> Woodland Grey<sup>®</sup> Dune<sup>®</sup>

\*Other select Powdercoat colours are available on request.

\* No smooth door can realistically be completely free from blemishes due to the steel roll forming processes used in the manufacture of garage doors. Such blemishes are not covered under the Manufacturer's warranty.
