

TILT DOORS

The most prominent visual feature of your building, factory or shed is often the garage door. So it makes sense to choose a Mirage V-Line tilt door because it's the ideal combination of strength, security and aesthetic appeal.

As tilt doors are predominately used in basement car parks, factors such as ventilation, strength, security and appearance are important. In a world of choice, Mirage has endeavoured to cover all possible needs with its diverse and innovative product range.

The Mirage V-Line tilt door has successfully serviced basement car parks for over 20 years. This range has proven to be the premier choice for superior strength and appearance.

Engineered using the latest roll-forming technologies, this door significantly increases the security of the basement lock-up garage. Often the forgotten feature of a multi dwelling development, this door will also significantly improve the appearance and marketability of your basement car park.
