

Glacier sectional garage door in Colorbond® Surfmist®

SAVANNAH GARAGE DOORS

Stylish, strong and durable. Steel-Line's innovative Savannah range delivers a smooth finish in a wide range of customised door designs. The Savannah is made from BlueScope® Steel G300 coil delivering a far smoother and virtually blemish and shadow free finish compared to our competitors' smooth finish garage doors, which are made from softer G2NS steel.

A small additional investment for a heavier grade garage door.

Shadowing or oil canning can be defined as a perceived waviness in the flat areas of metal panels. Oil canning is an inherent part of light gauge cold formed metal products, particularly those with broad flat areas such as garage doors. Most manufacturers warn against shadowing or obvious oil canning and will not cover in warranty provisions. By using a 0.7mm G300 steel, which is a stronger grade of steel than traditional steel used for garage doors, minimises visual oil canning.

A great range of designs and colours to choose from at an affordable price.

Steel-Line's Savannah range of garage doors is available in two designs – Slimline and Glacier and in a wide range of colours. If quality, durability and a genuinely smooth door are important, then make a Savannah garage door your choice.
