

Louvre Garage Doors

If you're ready to draw the line at average and reach for better call us today.

To locate Steel-Line branches across Australia call: **1300 427 243** or visit steel-line.com.au

Steel-Line's aluminium Louvre sectional garage door has been developed to give a high level of airflow and natural light transmission.

Steel-Line sets a new benchmark for Louvre garage doors. Designed and manufactured in Australia, our Louvre garage door is extremely strong and secure with a modern architectural look. Its ability to provide privacy for what is inside and still allow a minimum 22% ventilation, makes this the door of choice for many modern developments. The aluminium Louvre panels allow diffused natural light transfer into your garage whilst avoiding direct sunlight.

Steel-Line's stylish Louvre garage door can create a look that will complement the front of your home and give it more street appeal. There are numerous sizes and colours to choose from, and we can even custom built a Louvre garage door to suit your individual project needs.

Finger proof safety

Steel-Line's Finger Proof Safety™ feature in our Louvre garage doors is an award winning design. Each panel's specially designed curved edges protect fingers from becoming trapped in the folding sections of the doors as they open or close. This panel joint can safeguard your family against injury.

A great range of colours to choose from

Your garage door is possibly the largest exterior feature of your home so the right look and colour is essential. Steel-Line's Louvre garage doors are available in a wide range of Dulux® Powdercoat and Colorbond® colours.

Stringently tested to meet wind load requirements

Steel-Line Louvre garage doors have been engineered to the highest standard and tested at the JCU Cyclone Testing Station against the wind loading requirements of AS/NZS 4505-2012.

Designed for strength and safety

The wind rated Louvre garage door uses the proven wind brace post system developed for the standard range of wind rated Steel-Line sectional garage doors.

The Wind Brace design features a removable steel wind brace post or posts (dependant on door width) that is installed to the garage door once a cyclone warning is received. It takes about 2-5 minutes to install, and no tools are required. This feature allows the door to achieve a maximum C3 wind rating for wind region C and D in Australia.

Various design options to meet size and wind load requirements

LOUVRE GARAGE DOOR	WIND CLASSIFICATION	MAX DOOR HEIGHT (MM)	MAX DOOR WIDTH (MM)
Standard Louvre Door	N/A	3000	6500
Wind Rated Wind Brace Louvre Door	C2	3000	5600
	C3	3000	5500
