

Wind Rated Custom Collection Garage Doors

If you're ready to draw the line at average and reach for better call us today.

To locate Steel-Line branches across Australia call: **1300 427 243** or visit steel-line.com.au

Dress up your home with a stunning garage door that has successfully passed the C2 & C3 tests at JCU Cyclone Testing Station. Our wind rated Inspirations garage doors are available in a wide range of acrylic inserts or aluminium composite panel inserts or face-fixed design, for you to match with your home.

Stylish, safe and durable.

Steel-Line's innovative Custom Collection range of garage doors offers over a hundred different garage doors for you to choose from. You simply look at the façade of your home and decide what style would best suit – choose your frame colour and then match it with the insert which fits in best with the look you want.

The finished garage door will look architectally inspired and if you feel creative for a small premium Steel-Line can powder coat your frame any colour and glaze in customised inserts.

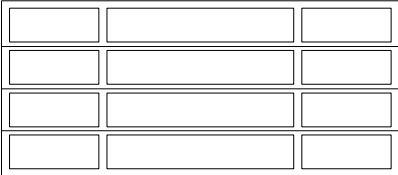

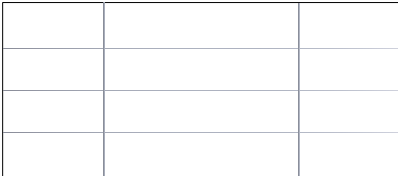

Not only will you get a stunning looking garage door but you will also get one with improved safety with our finger safe extrusion. At Steel-Line we think not only about giving your home a stunning look but also about protecting you and your family.

4 easy steps to create your Custom Collection garage door

1 Frame Options

		
aluminium framed 1 section	aluminium framed 2 sections	aluminium framed 3 equal sections
		
aluminium framed 3 section variation	aluminium framed 4 sections	aluminium framed 5 sections
		
aluminium composite 1 section	aluminium composite 2 sections	aluminium composite 3 equal sections
		
aluminium composite 3 section variation	aluminium composite 4 sections	aluminium composite 5 sections

NOTE The number of panels is determined by the height of the opening <2440mm (H) = 4 panels; >2450mm (H) = 5 panels.
 The maximum width of the "1 section" door is 2400mm, if the inserts are aluminium composite panels, acrylic, Western Red Cedar or aluminium treadplate.
 The maximum width of the "2 sections" aluminium composite door is 4800mm. Outside of these configurations, check with your Product Consultant on price and availability.

2 Standard Frame Colour / Material Options

						
Manor Red [®]	Terrain [®]	Jasper [®]	Sandbank [®]	Paperbark [®]	Classic Cream [™]	Evening Haze [®]
						
Dune [®]	Shale Grey [™]	Surfmist [®]	Windspray [®]	Wallaby [™]	Bushland [®]	Cove [™]
						
Gully [™]	Basalt [™]	Ironstone [®]	Pale Eucalypt [®]	Wilderness [®]	Cottage Green [®]	Mangrove [™]
						
Woodland Grey [®]	Deep Ocean [®]	Monument [®]	Night Sky [®]	Silver Kinetic Pearl [®]	Citi Pearl [®]	

NOTE: The colours shown are a guide only. The limitations of printing processes make extremely accurate matches impossible. We strongly recommend comparing your choice with actual samples, as the Inspirations finish variations in the colour will be evident. Additionally, Steel-Line reserves the right to vary or delete colours without notice.

3 Standard Insert Colour / Material Options

Aluminium Composite Panel - Metallic Silver

4 A small additional investment for greater convenience

simply safer

Fit your Steel-Line wind rated garage door with a specially designed automatic opener for safe and hassle free entry to and exit from your garage.

All of our openers are engineered to the highest standards ensuring easy operation, optimum performance, long life and peace of mind.

- Garage door stop programming allows for the garage door to be stopped at any height for the purpose of ventilation or pet access.
- Soft start / stop function to ensure smooth and quiet door operation
- Courtesy lighting illuminates your garage when the opener is activated.
- Manual Release: in case of power failure you can simply activate the manual release to open your garage door.
- Safety Auto Reverse System: door immediately stops and reverses when it comes into contact with an object.
- In-built Safety Timer: If optional photo eye beams are installed, the automatic closer timer will ensure that your door will close automatically if you forget to close it yourself.
- 7 year motor warranty, 2 year electronics warranty.

Powerhead

2 x Two Channel Key Ring Transmitters and 1 x wall mounted remote

Optional Wireless Keypad

Optional Battery Backup

Optional Secura-Lock

Wind Brace Design

Typical Post to Strut Connection Details

Locking Base Plate Fix to Floor

In high wind or cyclonic locations, Steel-Line wind rated Inspirations garage doors are widely used due to its superior strength and rigidity.

Stringently tested to meet wind load requirements

Steel-Line Inspirations garage doors have been engineered to the highest standard and tested at the JCU Cyclone Testing Station against the wind loading requirements of AS/NZS 4505-2012.

Designed for strength and safety

The wind rated Inspirations garage door uses the proven wind brace post system developed for the standard range of wind rated Steel-Line sectional garage doors.

The Wind Brace design features a removable steel wind brace post or posts (dependant on door width) that is installed to the garage door once a cyclone warning is received. It takes about 2-5 minutes per post to install, and no tools are required. This feature allows the door to achieve a maximum C3 wind rating for wind regions C and D in Australia.

FingerProof™ Safety Feature

Steel-Line's Inspirations aluminium sectional garage doors feature a curved finger proof joint for added safety. This unique design not only safeguards your family against serious injury, it also seals out elements that can penetrate conventional aluminium garage doors. For added safety you can also install a photo eye beam as an optional extra.

Various sizes and wind load requirements

WIND CLASSIFICATION	MAX DOOR HEIGHT (MM)	MAX DOOR WIDTH (MM)
C2	3000	5600
C3	3000	5500

NOTE

- The maximum opening height is 50mm less than the maximum door height; the maximum opening width is 100mm less than the maximum door width.
- Only aluminium framed design has FingerProof™ safety feature. The face-fixed design does not have the FingerProof™ safety feature.
