BX Bunka Australia

BX Bunka Australia Pty Ltd is the country's leading manufacturer, distributor and installer of residential doors in addition to offering a full suite of industrial, commercial and aviation door solutions.

Our comprehensive range includes garage doors, roller doors, industrial and commercial shutters, openers, components and end-to-end installation and servicing.

We are a wholly owned subsidiary of Bunka Shutter Co. Ltd, a Tokyo Stock Exchange-listed company headquartered in Japan with a global presence in the building products industry. This international backing supports our continued innovation, quality assurance and commitment to delivering tailored solutions for our customers across Australia.

BX Bunka Australia Pty Ltd employs 500+ people nationwide and operates under a portfolio of well-established brands, including:

- Steel-Line Garage Doors
- Steel-Line Garage Doors (WA)
- Dynamic Door Service
- Doorworks Garage Doors
- BX ARCO Australia Door Systems
- BX MAX Door Solutions
- BX SPRINT Roller Shutters
- BX Industrial Door Service

Together, these brands enable us to deliver specialised solutions across residential, industrial, commercial and aviation sectors, strengthening our ability to meet diverse client needs across Australia.

Vision

To create life-long partnerships with our customers by enhancing the safety, security, appeal and convenience of their homes and businesses across Australia.

Mission

Through our passion for providing safe, durable and stylish building materials for every Australian, we will deliver our customers a world class experience, maintain market leadership in safety, quality, service, delivery and price through continuous improvement and innovation.

Company Values

We believe that our continued success as a leading supplier of building materials in Australia is grounded in our purpose, values and conduct demonstrated each day through our passion for providing world-class service, ethical business practices, social and environmental awareness, commitment to our team members, customers, shareholders and partners.

We acknowledge and celebrate our company's history and the contributions, past and present, of our team members, customers and shareholders.

We have an unwavering commitment to our Five Corporate Priorities. We recognise that these priorities power our purpose and provide the foundation for our current and future success;

We continuously work towards creating and maintaining a workplace culture that:

- Values, recognises and rewards the contribution of our team members
- Motivates and inspires our team members to perform at their best
- Provides our team members with a safe, comfortable and enjoyable place to work
- Unifies our team members behind our common goals and who are proud to be a part of the BX Bunka Australia family
- Encourages all team members to support and help each other.

We embrace change and we are committed to innovation and remain relevant to meet the evolving needs of our customers and our business. We encourage:

- Product and process revolution that tests the boundaries of our imagination
- Job rotation to foster a multi-trained workforce and team member skill set
- Providing our team members opportunities to improve and grow themselves
- Creating an atmosphere where ideas to improve are shared by all and considered seriously and in a timely manner
- Exercising Quality Control Circles and implementation of PDCA (Plan Do Check Act)

Safety Commitment

We are committed to achieving "zero harm" by providing a safe environment for all team members, contractors and visitors at every BX Bunka Australia location.

We commit to always promoting and conducting safe working procedures.

We recognise that working safely is everyone's responsibility and is a condition of our employment.

We are committed to communicating and reporting any issues that may affect health, safety or well-being in the workplace.

We understand that, through our actions, we will achieve the level of safety that we demonstrate each and every day.

Quality Commitment

We are committed to providing our customers with the highest quality, value for money products and services.

This commitment is achieved through mutually beneficial partnerships with our suppliers, the ongoing training and development of our team members and the continuous improvement of our manufacturing, distribution and installation processes.

With our focus on quality to ***"Make it Once... Make it Right,"*** we will continue to strive to be a world class manufacturer and the leading building materials supplier in Australia.

Modern Slavery Report

This statement is made under the Modern Slavery Act 2018 (Cth) (the Act). It sets out the actions taken by BX Bunka Australia Pty Ltd (BX), an entity that operates in Australia to address modern slavery risks in our supply chain over the current financial year. These reports are submitted annually.

Steel-Line garage doors

Steel-Line Garage Doors is Australia's largest garage door manufacturer with a strong national presence and over 45 years of service to the Australian market.

Steel-Line has an owned and truly national distribution network of 17 branches through which we sell, install and service residential garage doors. Product sales are made directly to consumers, builders and resellers through the Steel-Line brand.

Our branch network enables Steel-Line to manage the entire end-to-end customer experience unlike many competitors who rely on 3rd parties.

For the East Coast markets, Steel-Line products are manufactured at a centralised, best-in-class facility in Brisbane, with certain custom doors manufactured in Melbourne. The West Coast market is serviced by its own factory and sales office in Perth.

DYNAMIC™ DOOR SERVICE

Dynamic Door Service is the largest supplier of Steel-Line Garage Doors to the Australian builder market, recognised for our exceptional customer service and industry-leading products.

Our commitment to quality has earned us numerous supplier awards and a trusted reputation among Australia's leading home builders. With deep industry knowledge, our experienced state managers and sales team are experts in their local markets and go above and beyond to meet the needs of builders and resellers. In addition to our product offerings, we provide comprehensive service capabilities, ensuring every client receives top-tier products and reliable, professional support throughout every stage of the project.

Focused on the new home builder market, Dynamic offers the quickest lead times in the industry, supported by Steel-Line manufacturing. Our guarantee of on-time installation dates helps builders stay on schedule and secure critical lock-up payments. We are known for our reliability, agility, and market-leading products, making us the preferred East Coast supplier for new home builders.

Our dedicated approach to the builder market, combined with fast, reliable service, ensures Dynamic is the go-to partner for construction projects, both large and small.

Project Portfolio

At BX Bunka Australia, our track record speaks for itself. We partner with leading builders and developers across the country to deliver tailored door and shutter solutions that meet the demands of residential, industrial, commercial and specialised environments.

This portfolio highlights a selection of completed projects that demonstrate our technical capability, commitment to quality and ability to deliver on time and to specification.

Savannah Flatline Sectional Door in Colorbond® Matt Monument

Project | Steel-Line Garage Doors

The Ridge, Nelson Bay

Project Overview

Client:
Greenbuild Construction

Project Location:
Nelson Bay, New South Wales

Scope of Work:
Installation of a Custom Flush Mount Sectional Garage Door

The Ridge at Nelson Bay is a luxury residential development requiring stylish, durable garage doors that complement its modern coastal design. Steel-Line Garage Doors was entrusted to provide innovative and stylish solutions to meet the project's high standards.

Project Specifications

Garage Door Type: Custom Collection Flush Mount Sectional Garage Door with Knotwood cladding.

Cladding Material: Knotwood. Cladded by the builder onsite.

Design Integration: Vertical Knotwood cladding enhances the modern coastal aesthetic, while aluminium battens provide a sleek finish with minimal maintenance.

Challenges & Solutions

Aesthetic and Architectural Integration: The development's design called for garage doors that seamlessly integrated with the modern coastal aesthetic while maintaining a sophisticated, high-end appearance. Steel-Line provided a flushed timber-look door to blend perfectly with the contemporary façade.

Durability Against Coastal Conditions: Located in a coastal environment, the garage doors needed to withstand salt-laden air and extreme weather conditions without compromising their look or functionality. The selected materials included corrosion-resistant aluminium and specially coated finishes to enhance durability and longevity.

Precision in Installation: Ensuring seamless installation within the tight construction timeline was critical to maintaining the project schedule. Steel-Line worked closely with the builders, providing expert consultation and precise manufacturing to ensure hassle-free installation and timely project completion.

Outcomes

The Ridge, Nelson Bay, now features premium quality garage doors that not only enhance the visual appeal of the residences but also offer superior durability and functionality. The successful integration of Steel-Line's Custom Garage Doors into this prestigious project highlights the company's expertise in delivering tailored solutions for high-end residential developments. The project stands as a testament to Steel-Line's commitment to quality, innovation and customer satisfaction.

Project | Steel-Line Garage Doors

Harmony in White Victoria

Project Overview

Client:
Mancini Made

Project Location:
Pasco Vale South, Melbourne, Victoria

Scope of Work:
Supply and install an Aluminium Frame Tilt Door

The Harmony in White project in Pasco Vale South represents a modern interpretation of traditional townhouse design, blending contemporary aesthetics with timeless architectural elements. Mancini Made led the design and build, delivering a visually striking development that sets a new benchmark in the area.

Steel-Line was entrusted with supplying an Aluminium Frame Tilt Door, which was cladded on-site by the builder using Cemintel Territory Woodland Birch.

Project Specifications

Garage Door Type: Flush Mount Aluminium Frame Tilt Door.

Cladding Material: Cemintel Territory Woodland Birch.

Design Integration: Vertical timber boards complement the townhouse's all-white exterior and align with traditional weatherboard aesthetics.

Challenges & Solutions

Material Selection for Durability and Aesthetic Appeal: Cemintel Territory Woodland Birch was chosen for its durability and ability to enhance the modern-traditional design approach. The material ensures long-term performance while maintaining a visually appealing finish.

Ensuring Structural and Functional Integrity: The Aluminium Frame Tilt Door was engineered to support the additional weight of the cladding without compromising functionality, ensuring smooth operation and longevity.

Achieving a Modern Yet Traditional Look: The combination of Cemintel cladding, vertical timber boards and a clean white façade allowed for a design that respects traditional influences while embracing modern craftsmanship.

Outcomes

The Harmony in White project successfully redefines townhouse aesthetics in Pasco Vale South. The careful integration of modern materials with traditional design elements resulted in a development that is both visually appealing and functionally superior. Steel-Line's collaboration with Mancini Made ensured that the Flush Mount Aluminium Frame Tilt Door seamlessly blended into the overall design, reinforcing the project's architectural vision.

The project stands as a testament to innovation, craftsmanship and the evolution of contemporary townhouse design.

Project | Dynamic Door Service

Azure Build Qld
Townhouse Complex

Project Overview

Client:
Azure Build Qld (Projects go to tender)

Project Location:
Richlands, Queensland

Scope of Work:
Supply and install garage doors for a 90-townhouse complex

Azure Build Qld engaged us to install garage doors in a 90-townhouse complex in Richlands. This project required precision in measuring, manufacturing and installing double sectional slimline doors with SD800 motors. Given the scale of the project and the need for a seamless workflow, coordination between teams was essential to ensure smooth execution. Through effective communication and logistical planning, we successfully met all project requirements while adhering to safety and quality standards.

Project Specifications

Garage Door Type: Slimline Sectional Garage Door in Colorbond® Basalt.

Motor System: Each garage door is equipped with an SD800 motor, providing reliable and efficient automation.

Design Integration: The Slimline profile enhances the overall façade of each townhouse, maintaining a uniform and aesthetically pleasing streetscape.

Challenges & Solutions

Building Relationships on a First-Time Collaboration: Since this was the first project working with Azure Build Qld, establishing strong communication and trust was essential. Regular site meetings, transparent discussions and a proactive approach helped foster a productive working relationship, ensuring that expectations were met and any issues were swiftly addressed.

Heavy Door Handling: The size and weight of the double sectional doors presented a significant challenge, particularly for single installers. Without any on-site parking available, installers had to park on the street, making unloading and transporting materials difficult. To mitigate safety risks and improve efficiency, Azure Build Qld provided labour assistance to help our installer unload, lift and position doors safely, reducing strain and improving installation times.

Quality and Durability: To ensure a long-lasting and high-quality finish, all garage doors were manufactured from durable materials and installed with precision. Post-installation inspections were conducted to confirm that each door met strict quality standards, providing long-term reliability and customer satisfaction.

Outcomes

The project proceeded smoothly without major issues, thanks to effective coordination between teams. The final installation met all quality expectations. The project's success led to additional tenders being won, with ongoing work now taking place in Bundamba and North Lakes. This accomplishment reinforces our expertise in efficiently and safely handling large-scale residential garage door installations.

Project | Dynamic Door Service

Quindi Court
Victoria

Project Overview

Client:
Beachstone Homes

Project Location:
Mornington Peninsula, Victoria

Scope of Work:
Custom Tilt Garage Door design, manufacture, and installation

Award:
HIA Eastern Victoria 2021 Custom Built Home ($1.5 Million – $2 Million)

Quindi Court is a bespoke home that exemplifies contemporary family living, situated on Victoria's Mornington Peninsula. Recognised for its luxurious finishes and meticulously considered design, this award-winning residence was the recipient of the HIA Eastern Victoria 2021 Custom Built Home Award ($1.5 Million – $2 Million).

Beachstone Homes entrusted our team with manufacturing and installing a custom Tilt Garage Door, seamlessly integrated into the home's architectural vision. Cladded in Shiplap, the door complements the home's modern aesthetic while ensuring durability and functionality.

Project Specifications

Garage Door Type: Tilt Garage Door.

Cladding Material: Shiplap.

Design Integration: The Tilt Garage Door seamlessly blends with the home's luxurious architectural style, enhancing curb appeal with a contemporary finish. Precision-engineered for smooth operation and longevity, it was custom-fitted to perfectly match the home's façade.

Challenges & Solutions

Seamless Aesthetic Integration: Custom fabrication and precise installation ensured the garage door blended perfectly with the home's architectural lines, enhancing its overall design continuity.

Precision Installation for Smooth Functionality: Advanced engineering and high-quality components were used to guarantee a flawless tilt mechanism, ensuring effortless operation for the homeowner.

Maintaining Luxury and Longevity: Premium materials were selected for both the frame and cladding to provide a long-lasting and weather-resistant solution, aligning with the high standards of Beachstone Homes.

Outcomes

The Quindi Court project exemplifies our ability to deliver high-quality, custom-built garage doors that align with award-winning architectural designs.
The Tilt Garage Door, cladded in Shiplap, successfully enhances the luxurious aesthetic of this modern residence while providing durability and seamless operation. This project highlights our commitment to craftsmanship, innovation and collaboration with leading home builders to achieve award winning results.

Project | BX ARCO Australia Door Systems

Tesla
Gold Coast

Project Overview

Client: Tesla

Project Location: Gold Coast, Queensland

Scope: Design, manufacture, and installation of A3000 Counterweight Door

BX ARCO manufactured and installed an A3000 Counterweight Door for the new Tesla showroom in Gold Coast. This large-scale door, spanning 10 metres, was designed to provide a sleek, modern entryway that aligns with Tesla's high-tech brand identity. The door features 6.38mm Laminated Safety Glass for durability and visibility, while a Powdercoated finish enhances its aesthetic appeal. This installation showcases BX ARCO's commitment to delivering premium, functional, and visually striking entrance solutions for commercial spaces.

Project Specifications

Product: A3000 Counterweight Door

Size: 10 metres wide

Glazing: 6.38mm Laminated Safety Glass

Finish: Powdercoated

Challenges & Solutions

Managing the Large Door Span: Engineering precision was applied to ensure the structural integrity and stability of the 10-metre-wide door while maintaining smooth functionality.

Safety and Durability of the Glazed Panels: 6.38mm Laminated Safety Glass was used to provide impact resistance while maintaining a transparent and modern aesthetic.

Aesthetic and Branding Consistency: The Powdercoated finish was selected to complement Tesla's modern and minimalist showroom design, ensuring a cohesive visual identity.

Seamless Installation & Operational Efficiency: The counterweight mechanism was carefully calibrated to provide a balance between strength and ease of use, ensuring optimal performance.

Outcomes

The successful installation of the A3000 Counterweight Door at the Tesla showroom highlights BX ARCO's ability to deliver high-performance, aesthetically refined commercial entry solutions. The combination of premium materials, precision engineering, and sleek design has resulted in a functional yet visually impressive entryway that aligns perfectly with Tesla's innovative brand image. This project underscores BX ARCO's expertise in manufacturing and installing large-scale, architecturally significant doors that meet both operational and aesthetic requirements.

Project | BX MAX Door Solutions

Royal Torino

Project Overview

Client: Royal Torino

Project Location: Confidential

Scope: Installation of PanelMAX® 80 (PM80) dock doors for insulation and efficiency

BX MAX Door Solutions prioritises strength, durability and simple operation in its product designs. For our latest project at Royal Torino, we installed PM80 doors on the internal side of eight docks, improving insulation between the cold room and the external surroundings of the building.

Our expert installation team managed both the mechanical and electrical setup of the doors and integrated a UPS system to ensure continued operation in case of power outages.

The system also allows interlocking between the dock controller and our PanelMAX® Doors, enhancing both safety and efficiency.

Project Specifications

Product: PM80 Doors with UPS System and interlocked operation with Roller Shutters and PanelMAX® Doors.

Quantity: 8 units

Dimensions: 2800mm W x 3000mm H

Motor System: GfA Direct Drive System

Challenges & Solutions

Maintaining Optimal Insulation Efficiency: PM80 doors were installed with precision to minimise air leakage and ensure temperature control within the cold storage area.

Ensuring Continuous Operation During Power Outages: A UPS system was implemented to allow the doors to function seamlessly even during power failures, preventing operational downtime.

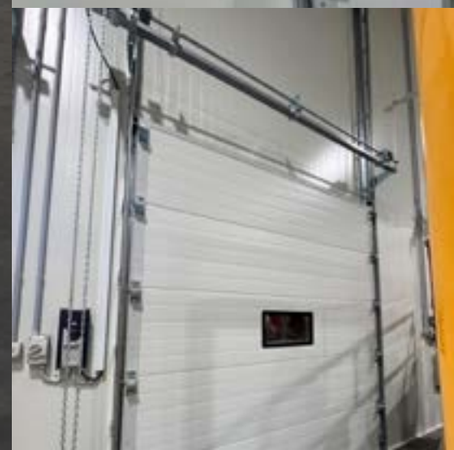

Integration with Existing Roller Shutters and PanelMAX® Doors: The doors were interlocked with Roller Shutters and PanelMAX® Doors, creating a synchronized system for enhanced security and functionality.

Mechanical and Electrical Installation Complexity: Our installation team carefully executed both mechanical and electrical setups, ensuring proper alignment and optimal performance.

Outcomes

The successful installation of PM80 dock doors at Royal Torino significantly improved insulation and operational efficiency. By integrating a UPS system and interlocking mechanisms, BX MAX Door Solutions delivered a reliable, durable and efficient solution that meets the client's needs. This project reinforces our commitment to high-performance door solutions that prioritise strength, durability and seamless operation.

Project | BX SPRINT Roller Shutters & Steel-Line Garage Doors

Shoalhaven Material Recovery Facility

Project Overview

Client: Shoalhaven Council

Project Location: Shoalhaven Material Recovery Facility

Scope: Installation of BX SPRINT Roller Shutters

BX SPRINT Roller Shutters, in partnership with Steel-Line Garage Doors Wollongong successfully installed 15 BX Sprint Windlocked Roller Shutters at the Shoalhaven Material Recovery Facility for Shoalhaven Council. The project required high-performance, durable shutters to enhance operational efficiency and security at the facility.

Project Specifications

Product: BX SPRINT Windlocked Roller Shutters

Quantity: 15 units

Slat Size: 100mm slats

Dimensions: 8 m high x 8 m wide

Finish: Powdercoated in Pale Eucalypt

Motor System: Grifco 2hp 3-phase Mechanical Motors with Standard Controls

Challenges & Solutions

Large-Scale Installation: The project required the installation of oversized Roller Shutters, which we managed efficiently through precise planning and coordination.

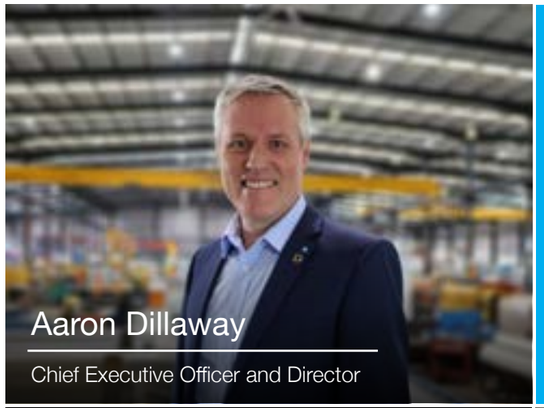

Windlocked System: Ensuring enhanced wind resistance and structural integrity for optimal performance in varying weather conditions.

Motorised Operation: The Grifco 2hp 3-phase motors provide reliable, smooth, and efficient operation, meeting the facility's high-usage requirements.

Outcomes

The installation of 15 BX SPRINT Windlocked Roller Shutters successfully enhanced the functionality and security of the Shoalhaven Material Recovery Facility. The Roller Shutters provide seamless operation, durability and superior protection, meeting the client's expectations and operational needs.
