Ultra Strong the Stadium Grille provides increased flexibility in high level strength for external (shutter) and internal (shop front doors) applications and is the product of choice for areas where high air flow and vision is required. The Stadium Grille is designed to suit openings up to 4.5m high and up to 8.0 metres wide in a single span.

Features

- Custom built
- Vision
- Ventilation
- Robust
- Easily installed

Recommended Specification

The Stadium Grille is suitable for a variety of commercial applications such as car parks, shopping centres, arcades, sporting complexes, clubs, bars and counter tops.

Curtain

The Stadium Grille curtain is constructed from 19mm extruded aluminium tube at 75mm centres, connected with 40mm x 3mm designed links spaced at 500mm centres forming a brick like pattern.

Side Guide

100mm x 38mm aluminium extrusions which can be either fitted with a Rubber Twin Fin Extrusion or Mohair Felt Buffer for a quieter operation.

Locking

The Stadium Grille doors can be fitted with a locking system. Locking is centrally mounted within the Bottom Rail. Manual locking is not recommended where doors are motorised.

Operation

The Stadium Grille can be either manually operated by hand or electrically operated.

There is a wide selection of control methods available with motorised doors and these options can be discussed with Steel-Line when determining your design requirements.

Motorisation Methods

The Stadium Grille can be motorised with either three phase or single phase, one horsepower motors suitable for high use environments or with the use of a centrally mounted drum motor in low use environments.

The drum size is dependent on method of operation and size of opening. Please contact Steel-Line for details.

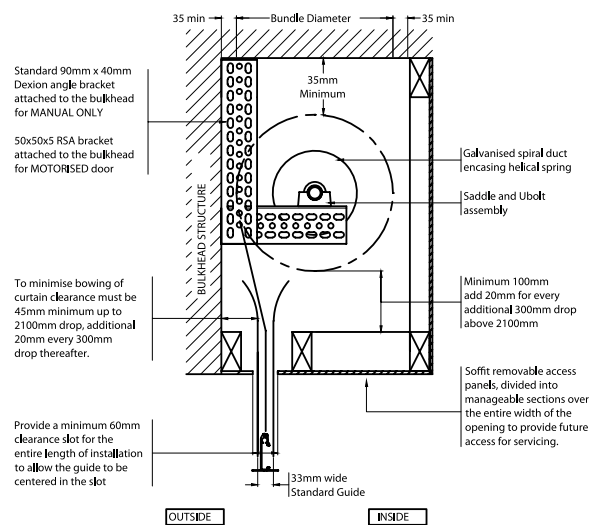

Size

The Stadium Grille is suitable for openings up to 7850mm wide and 4.5 metres high.

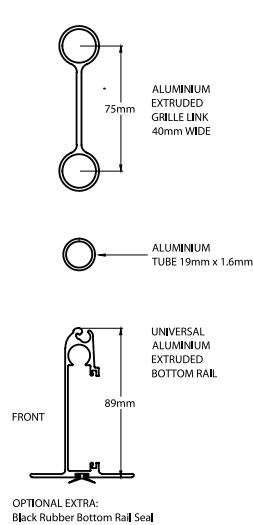

Finish

The Stadium Grille is manufactured and supplied standard in a Clear Anodised Finish (Matt Natural), however an option to be powder coated is available.
